Subject: RE: Army Creek Landfill Work Plan - Response to OASQA Comment 12

Thank you Debbie for your emails of yesterday and today regarding our responses to comments from EPA's Office of Analytical Services and Quality Assurance (OASQA) on our work plan for additional investigations at Army Creek. We will take them into consideration and be prepared to discuss them during our July 25 call, as needed.

I will ask Theresa and Michele to contact you for further clarifications, if any are needed.

Thanks,
Mike

Subject: [EXTERNAL] Army Creek Landfill Work Plan - Response to OASQA Comment 12

Mike and Mike,

After further consideration of the memo I emailed to you yesterday, I spoke with an OASQA chemist today. Since the concentrations of PFOA and PFOS in groundwater samples are generally high compared with EPA's Drinking Water Health Advisory and because the environmental sample to field blank ratio is expected to reasonably low (it was less than 5 to 1 for the 2016 sampling event), EPA finds ACPS and NCC response to OASQA comment 12 to be acceptable.

Debbie
